

Lesson 2 Policy Transactions

Note: No lab for this lesson.

2.1 References

Tip

I hear the word “job” a lot. Is it related to a transaction?

The terms “job” and “policy transaction” are synonymous. The term “policy transaction” is typical in the industry and is used in the user interface. The term “job” is used in the data model, in user interface configuration and in business rules.

Tip

What is a workflow?

A **workflow** is a component used for executing custom business processes asynchronously. In the default installation, only renewal and cancellation jobs have workflows.
